Dear «Salutation» «Surname»,

We, the doctors of *Medicine With Morality*, wish to thank you for your support for the value of human life and in particular for your opposition to the cloning bill.

We ask you to continue to keep us in mind. The letterhead tells what we are about and the Latin inscription is part of the Hippocratic Oath. As you can see from the signatories below we are from many disciplines of medicine including specialties concerned with beginning and ending of life.

Medicine With Morality is growing slowly as more doctors become aware of what is at stake if we devalue human life at any point.

Medicine With Morality is not a religious organisation. Doctors of any faith or no faith can be signatories as long as they hold to the Manifesto of Human Life on the website. Some doctors who agree with our stand choose not to be signatories so as not to dilute their effectiveness in other organisations with which they are involved. Others sign in but do not wish their names to be on the letters for similar reasons.

You will realise of course that *Medicine With Morality* is much bigger than just destructive embryo research and cloning. Issues relating to embryo selection, abortion, infanticide, euthanasia and disability are matters that concern us. The dependent and vulnerable must be protected at all stages of existence otherwise we open the door to the discarding of human life depending on the value we attach to it.

We wish to be of value in any way we can.

Dr Lachlan Dunjey MBBS FRACGP DObstRCOG
Medicine With Morality

NO confusion! We must not devalue human life!
